

STONEUK - ST-RR 4

The ST-RR4 is a reliable and flexible four-channel wireless RF remote control receiver designed to manage multiple devices from a single unit. Operating at 433.92 MHz or 315 MHz, this receiver features a sturdy metallic enclosure and utilizes a learning code system for quick and secure pairing with compatible RF transmitters. Powered by 12V DC, the ST-RR4 provides a stable wireless range of 50 to 100 meters in open areas. It's an ideal solution for controlling garage doors, electric gates, lighting systems, or smart automation setups that require multi-channel functionality.

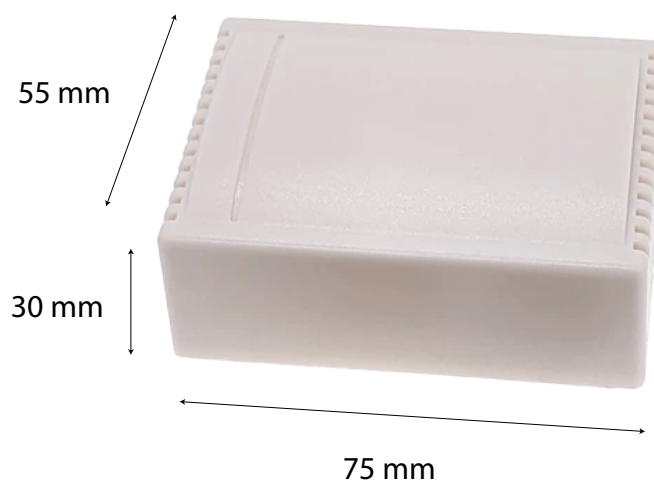

KEY FEATURES

- A Versatile Four-Channel Wireless RF Remote Control Receiver
- Supporting Both 433.92 Mhz and 315 Mhz Frequencies
- Supports Learning Code System
- Ideal for Controlling Garage Doors, Gate Openers, Lighting, or Other Automation Systems
- It Features a Robust Metallic Casing
- Transmission Range of 50 to 100 Meters in Open Environments

PRODUCT PARAMETERS

Button	1/2/3/4 Buttons
Encoding Type	Learning Code
Material	ABS, Metal
Range	50 to 100 m
Frequency	433.92MHz and 315MHz
Input	12 V DC
Oscillation Resistance	340K
Output Terminal	No / Nc / Com
