

## STONEUK - ST-S5A

The Stoneuk ST-S5A is a high-performance smart power supply unit engineered for access control and security applications. Built using advanced smart power chips and manufactured with a professional, high-precision production process, this device meets global certification standards for quality and reliability. The ST-S5A has undergone rigorous testing for electromagnetic interference, short circuit protection, overvoltage, and overcurrent protection, ensuring stable and secure operation in demanding environments. Ideal for powering intercom systems, access control devices, electric locks, and surveillance components.

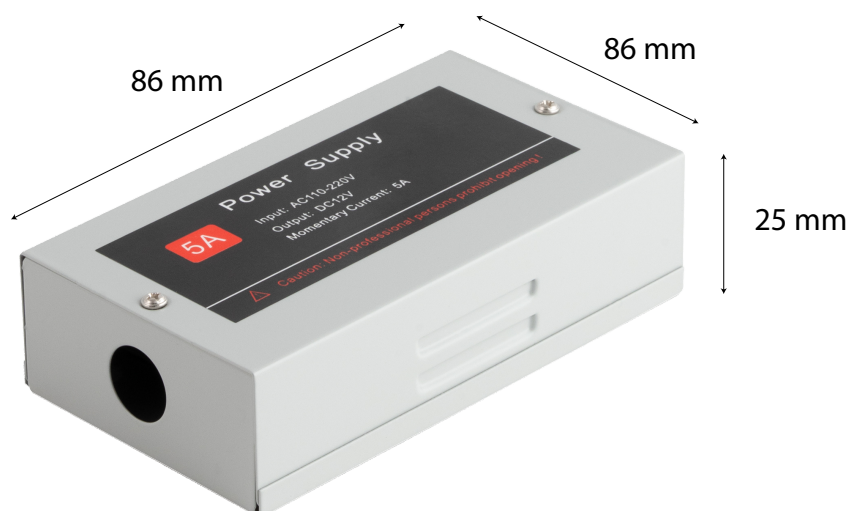

### KEY FEATURES

- A High-Performance Smart Power Supply Unit
- Engineered for Access Control and Security Applications
- Built Using Advanced Smart Power Chips
- Manufactured with a Professional, High-Precision Production Process
- Global Certification Standards for Quality and Reliability
- Ideal for Intercom Systems, Access Control Devices, Electric Locks, Surveillance Components

## PRODUCT PARAMETERS

|                 |                                   |
|-----------------|-----------------------------------|
| Input           | 110 to 220 V AC                   |
| Output          | 12 V DC                           |
| Material        | Zinc Alloy Material               |
| Safety Function | Built-In Voltage Spike Suppressor |
| Delayed Time    | 0 to 10 s                         |
| Output Terminal | No/Nc/Com                         |
| Dimension       | 86 X 86 X 25 mm                   |
